Session 3

Charlotte Patterson, Scott Forrest
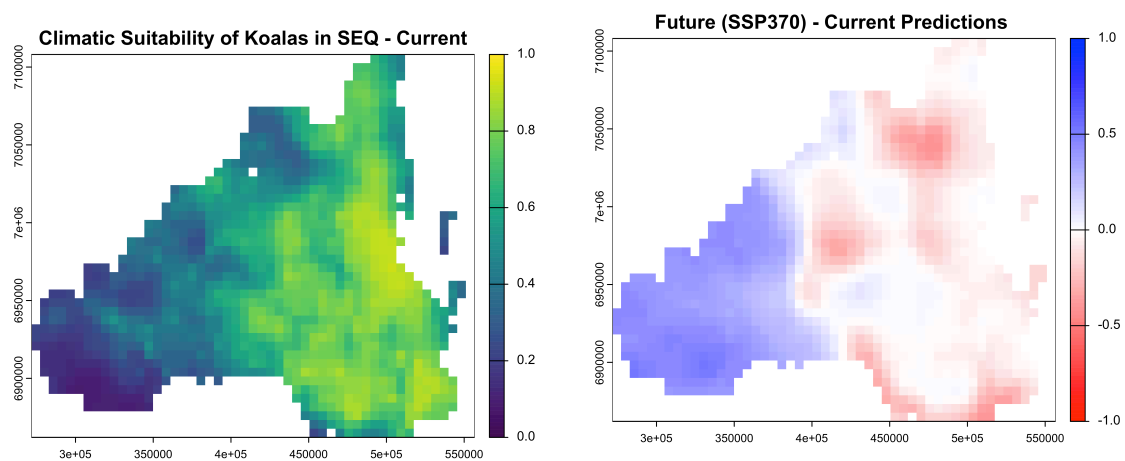

2025-06-14

Table of contents

In this session we are fitting species distribution models to the data of koalas (*Phascolarctos cinereus*) in the South-East Queensland (SEQ) region under current climatic conditions, which we will predict into future climatic conditions.

Figure 1: Koala (*Phascolarctos cinereus*)

(a) Current climatic suitability of koalas in SEQ

(a) Projected change of climatic suitability for koalas in SEQ
